Databases:	SQL Server 2008/2016+, Entity Framework (EF / EF Core), LINQ
API & Security:	Restful APIs, Authentication & Authorization, Secure Transactions
ORM & Data Access:	Entity Framework Core, LINQ, Stored Procedures
Methodologies:	Agile (Scrum), SDLC, Incident Management, Defect Life Cycle
Tools & IDEs:	Visual Studio, Visual Studio Code, Postman, Git

PROFESSIONAL EXPERIENCE

- I Worked as a **Software Engineer** at **HCL Technologies** from April 2022 to January 2026
- I Worked as a **Software Developer** at **Wyzmindz Solutions** from Oct 2020 to Dec 2021

EDUCATION

Master of Computer Applications (MCA)

Sri Venkateswara University, Tirupathi | May 2019

PROJECTS

HCL Technologies | India | *Apr 2022 – Jan 2026*
Software Engineer

TIPS – Transcon Inventory Production System | July 2023 – Jan 2026

Role: Software Developer

Stack: ASP.NET MVC, Web API, Entity Framework, Java Script, C#, jQuery, Ajax, SQL Server.

Description: Tips is a Production management system. It helps the team to monitor the production of a product from accepting the order to the delivery of product.

Roles & Responsibilities

- Developed and enhanced modules using ASP.NET MVC, Web API, C#, and jQuery.
- Worked on API debugging, issue analysis, performance optimization, and production defect resolution.
- Implemented client-side and server-side validations to ensure data accuracy.
- Implemented Entity Framework Core for database connectivity and CRUD operations.
- Used Git for source control and followed Agile/Scrum development practices.

Disney Vacation Club - Booking & Reservation System | Apr 2022 – June 2023

Role: L1.5 & L2 Support

Stack: Service Now, Splunk, SSMS (MS SQL Server), ASP.NET MVC

Description: Disney Vacation Club (DVC) is Disney's vacation ownership program where members receive annual vacation points to book stays at Disney resorts. It offers flexible vacation planning through a points-based membership system.

Roles & Responsibilities

- Provided **L1.5/L2 production and application support**, monitoring application health and resolving incidents within defined SLAs.
- Analysed **application and IIS logs using Splunk** to troubleshoot errors, performance issues, and production incidents.
- Executed **SQL queries in SSMS** to validate data, investigate transaction issues, and identify data-related problems.
- Monitored **Windows services and scheduled jobs**, troubleshooting failures and coordinating with relevant teams for resolution.
- Supported **production deployments, hotfixes, smoke testing, incident management, and escalation** to development/infrastructure teams.

Wyzmindz Solutions | India | *Oct 2020 – Dec 2021*
Software Developer

Convera Holdings | Oct 2020 – Dec 2021

Role: L1 Support Engineer

Stack: Asp. Net MVC, JavaScript, C#, SQL Server.

Description: Convera is a multi-currency financial platform that enables businesses to hold, convert, and manage funds across multiple currencies and supports cross-border payment transactions. The application handles financial transactions and provides secure and reliable payment processing capabilities for business customers.

Roles & Responsibilities:

- Provided L1 production and application support, monitoring application health and resolving incidents within defined SLAs
- Troubleshot application errors, transaction failures, login issues, and payment-related incidents using logs and monitoring tools
- Used SQL Server queries to validate transaction data, investigate issues, and support production troubleshooting
- Escalated complex issues to L2/L3 development, database, and infrastructure teams with detailed analysis and relevant logs.
- Supported production releases, smoke testing, incident management, and stakeholder communication to ensure application availability and stability
